

Security and Convenience for users of Kyocera MFPs.

Equitrac Embedded for Kyocera puts convenient and secure release of prints — as well as complete tracking of copies, scans and faxes — at your fingertips, in the touch screen control panel of your embedded software capable Kyocera multifunction product (MFP).

Part of the Equitrac Office® and Equitrac Express® solutions, Equitrac Embedded for Kyocera takes full advantage of the customization capabilities of Kyocera's reliable MFPs widely deployed in enterprise, general office and education environments. This means now you can enhance document security, protect personal information and provide users the mobility and convenience of Follow-You Printing® with no terminals to purchase, install or maintain.

New levels of efficiency and control for walkup services.

- Simplify tracking and management of copies, scans and faxes.
- Promote user mobility, convenience and productivity.
- Enhance security of printed documents released on networked Kyocera MFPs.
- Manage total output volumes and eliminate waste.

Saving time, increasing productivity, enhancing security.

Network login or ID entry on the device provides users instant authentication to access the full power of the Kyocera MFP without having to continually re-enter credentials for their allowed copying, scanning, faxing or email services.

Follow-You Printing increases mobility and productivity by freeing users to output documents at the MFP of their choice – across servers, departments and even geographic boundaries. Secure Document Release protects confidential information by assuring jobs are printed only by the appropriate user when they are physically at the device.

Complete and accurate cost management.

Equitrac software captures all MFP job attributes to simplify and automate the charging of variable rates based on document features. Paper size and use of color or black and white – for both copies and prints – can be detected on a page-by-page basis for accurate usage reporting and allocation to correct account codes for individuals, departments or other funding sources.

Equitrac Embedded for Kyocera MFPs

Advanced technologies, combined for your benefit.

Equitrac Embedded for Kyocera MFPs is the result of industry leaders working together to streamline your workflow and help you realize your full cost management potential. Seamlessly integrated with Kyocera's customizable development platform, Equitrac Embedded for Kyocera MFPs extends the power of Equitrac solutions to users of Kyocera MFPs, delivering advantages of convenience, security, productivity and economy in ways that no one can match.

Review documents

Review document content prior to printing

Press to release

Simply press PRINT to output selected documents.

Eliminate waste

Delete unneeded documents before printing.

Print anywhere

Enjoy complete mobility by accessing documents waiting on any print server.

Equitrac Embedded for Kyocera MFPs features a Device Control Engine that collects copy, scan and fax data through the device's front panel for automatic transfer to Equitrac solutions for the office, enterprise and educational environments. With no terminal required, Equitrac Embedded software reduces your equipment costs while speeding your return on investment.

Advanced Features

Cost management

- Fully integrated with Equitrac Office cost management solutions and Equitrac Express pay-for print/copy solutions
- Copy, scan and fax tracking captures all document activity
- Eliminates unauthorized printing and the waste of uncollected print jobs
- Color quota enforcement
- Billing code selection at start of session
- Account balance enforcement

Ease of use

- Simple, familiar, touch screen on Kyocera device
- On-screen alphanumerical soft keyboard

- Single integrated user experience simplifies workflow, increases user satisfaction
- English, French, Italian, German, and Spanish language support

Security

- Follow-You Printing® for mobile and secure document release
- Documents output only when users are ready to pick them up from the MFP
- Network login or PIN authentication and access control
- Mag stripe, Mifare®, Legic and HID card reader support
- Session limit enforcement

IT simplification

- Automated installation
- No terminals for IT to install or support
- No additional IP addresses or network drops
- Centralizes device management and control
- Reduces printer-related help desk calls
- Offline support allows limited MFP use in case of network outage
