

ADVANTAGES

Capture all cost recovery expenses — print, copy, fax, scan and disbursements

Simplify charging of documents to client matters or projects

Increase user productivity with Follow-You™ printing

Protect confidentiality with Secure Document Release

Industry standard Windows® CE platform

BENEFITS

Maximize cost recovery

Plugs into your existing network

Easy to use

Full data security in the event of power outages

Space-saving compact design

Flexible Control Terminal for Equitrac Professional

Maximizing your professional firm's cost recovery depends on accurately capturing and allocating every document output to any device. Equitrac PageCounter® can help.

Equitrac's compact and flexible terminal for print, copy, fax and scan control integrates into existing networks and mounts directly on most devices. Used in conjunction with Equitrac's Professional software suites, PageCounter provides a complete solution for print tracking, cost recovery and document security.

With an easy-to-use PIN-entry keypad, PageCounter enables fast and accurate allocation of document costs to the correct client matter or project. This virtually effortless user authentication also increases document confidentiality. With Equitrac's Follow-You™ Printing solution, documents are printed through a centrally managed server and then securely released from the print queue only when employees authenticate themselves at the printer using the PageCounter terminal.

Standards-based for seamless integration, PageCounter features an embedded Windows® CE-based application, real-time TCP/IP communications and dual Ethernet ports allowing connection of both the terminal and a networked multifunction device in a single network drop. Offline capability assures capture of copier usage when the network is unavailable.

Flexible design makes it easy to configure PageCounter to your needs.

Versatile, modular, and user-friendly, PageCounter fits into any environment.

PageCounter speeds and increases cost recovery with easy-to-use options and features. Optional Search, Scan and Recall help users find and select the correct accounting information simply by pressing a button.

SmartPrompts enable access to conditional fields. Speed Codes and Job Codes simplify the entry of data by creating one simple unique code to replace multiple fields of accounting codes.

Offline capability ensures no lost data and that network errors don't affect copying.

PageCounter Terminal

PageCounter Terminal with Optional Keyboard

Usability Features

- Easy to read 4 line display
- Up to 16 data entry prompts
- Optional Search, Scan and Recall keys
- SmartPrompt for conditional prompts
- Speed & Job Codes for quick data entry
- Space saving copy/fax terminal option
- Remote diagnostic capability
- 3 large configurable keys for easy usability

Software Features

- Configurable IP address (DHCP, BOOTP, or Manual)
- Stores up to 10,000 transactions
- Supports 100,000 user/client/matter codes
- Transactions sent and table data updated in real time
- Up to four alternate modes of operation
- Detects and accurately tracks Group 3 (G3) and Super G3 (V.34) fax activity
- Supports scan tracking from selected multifunction devices

Hardware Features

- 10/100 Ethernet port
- Dual Ethernet ports offer mini-hub functionality
- High-speed 32-bit processor
- 128 MB CompactFlash data storage for offline capability
- Adjustable mounting bracket for wall or table mounting
- Integrated Super G3 (V.34) fax tracking components in fax terminal
- Optional QWERTY keyboard with separate numeric pad
