

## ADVANTAGES

- ▶ Recover Copy, Fax, Scan and Disbursement Costs
- ▶ Efficient Dual Ethernet and Optional Dual Fax
- ▶ Maximize Cost Recovery Billable percentage

## BENEFITS

- ▣ Plugs into your existing network environment
- ▣ Easy to read large color display
- ▣ Full data security in the event of power outages
- ▣ Keyboard optimized for cost recovery environments

## Equitrac's Flagship Cost Recovery Control Terminal

With the competitive nature of today's market, it is essential that professional firms maximize the recovery of document costs incurred on behalf of their clients. The PageCounter Professional control terminal offers a complete solution to meet the needs of these firms.

PageCounter Professional is Equitrac's most advanced cost recovery terminal for collecting copy, fax, scan and disbursement data related to client billing. Its unique software-based architecture makes this terminal versatile and user-friendly, fitting into any professional environment to help increase billable percentages and overall accuracy.

Added to its modern look and feel, PageCounter Professional's flexible software and hardware provide a number of benefits, including: TCP/IP support for easy integration, enhanced graphical interface, real time communications, easy to use online help, remote diagnostic support for fast serviceability and a database architecture for full offline capability. PageCounter Professional also offers secure document release, which allows a document to be held at the print server until the person who initiated the print job retrieves the document at a specified device.

To maximize the usage of each terminal, the dual fax option allows one terminal to control up to two fax machines and a copier from a single terminal. PageCounter Professional also offers standard dual Ethernet ports for mini-hub capability. This permits firms to connect the PageCounter Professional and a networked multifunction device into a single network drop. In addition, the support for up to seven modes of operation permits one terminal to track copy, fax, scan, postage, and a number of other client-related charges simultaneously.

*Equitrac's PageCounter Professional offers firms the features they need to maximize their cost recovery rates.*

PageCounter Professional tracks copy, fax, scan, postage, and a number of other client-related charges simultaneously.

## FEATURES

### Usability Features

- Enhanced graphic user interface (GUI)
- Up to 16 data entry prompts
- Large Search, Scan and Recall keys
- SmartPrompt for conditional prompts
- Secure document release printing
- Speed & Job Codes for quick data entry
- Recent history transaction look-up
- Dual fax option within terminal
- Adjustable display casing to avoid glare

### Software Features

- Configurable IP addressing (DHCP, BOOTP, or Manual)
- Stores up to 10,000 transactions
- Supports 200,000 user/client/matter codes
- Data updated in real time
- Up to seven alternate modes of operation
- Detects and accurately tracks Group 3 (G3) and Super G3 (V.34) fax activity
- Supports scan tracking from selected multifunction devices
- Remote diagnostic capability

### Hardware Features

- Standard 10/100 Ethernet
- Dual Ethernet ports offer mini-hub functionality
- High-speed 32-bit processor
- 128MB Compact Flash data storage for offline capability
- Color 640 x 480 display
- QWERTY Keyboard with numeric pad
- Integrated Super G3 (V.34) fax tracking components in fax terminal
- Optional Magnetic stripe support

### Advanced Features

PageCounter Professional provides proven cost recovery options to make its usage quick and efficient. The Search, Scan and Recall features help find accounting information simply by pressing a button. SmartPrompts enable access to conditional fields. Speed Codes and Job Codes simplify the entry of data by creating one simple unique code to replace multiple fields of accounting codes.
