- Pull/Follow & Secure Printing
- Mobile, BYOD & Guest Printing

"After evaluating nine competitive solutions, we can clearly say PrinterLogic's solution is the best on the market. It saved us money, time and frustration—all while improving print services for our employees."

— *Lufthansa Technik AG, Project Manager*

"The print server now holds zero value. We did a very easy transition away from our old servers to PrinterLogic's centralized solution. We can even lose data connections to the branch, and still have our users print locally."

— *AAA of North & South Carolina, IT Operations Manager*

PrinterLogic

Product Overview

PrinterLogic's web-based application eliminates print servers and delivers a single integrated platform that increases functionality and lowers cost. It also reduces headaches and saves valuable time by giving you centralized management over your entire print environment, while empowering end users to install their own printers.

Centrally Managed Direct IP Printing

- Effortlessly import and migrate all printers with PrinterLogic's admin console
- Centrally manage end-user printers, drivers, device settings and preferences
- Automatically apply all changes made by the administrator to end-user printers
- Eliminate complicated scripting and GPOs
- Deploy printers based on AD user, group, OU or IP address range
- Limit functional IT workers with role-based access control

Self-Service Printer Installation Portal

- Empower end-users to self-install printers with a single click
- Provide optional floor plan maps to help locate and install printers
- Significantly reduce the number of help desk calls

Print Job Auditing and SNMP Monitoring

- Generate reports to proactively control costs and manage resources
- Track and audit print jobs by user, department, job title or printer
- Tie actual cost of printing to usage data
- Monitor physical printer statuses through SNMP
- Share print usage and costs with department managers

## Simplified Remote Session and VDI Printing Environments

- Auto-deploy printers in sessions based on IP address of endpoint device
- Instantly create printers in the sessions and speed up login times
- Leverage VDI compression for print jobs across the WAN

Pull/Follow and Secure Printing

- Ensure print jobs are not released until the user is at printer to pick them up
- Release print jobs to any printer authorized to receive pull print jobs
- Utilize a browser, badge/card scanner or embedded control panel to release print jobs
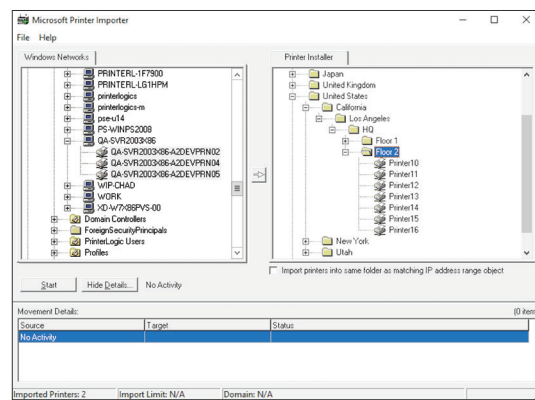

Mobile, BYOD & Guest Printing

- Print natively from Android, iOS and Chromebook
- On- or off-network direct email-to-print functionality
- No software to install on device or additional printers needed
